

Interview with ChatGPT

Podcast

ELA

5 hours

Grades 9 - 10

Self-guided

The Point

While AI that produces human-like language has improved significantly in recent years, it's still up to humans to use the text, evaluate its truthfulness, and decide whether it is meaningful.

Objectives

- Explain the abilities and limitations of chatbots like chatGPT that aim to be informative
- Compare and contrast the role of AI and humans in information-providing roles such as an expert on a podcast

Materials

- Internet-enabled devices *with a microphone* for students
- Student access to: (1) the [Student Guide](#), (2) podcasters.spotify.com for podcast production, and (3) chat.openai.com for ChatGPT

Activities

Make sure students have access to the [Student Guide](#)

Please note that OpenAI requires parental consent for students under 18 to create a ChatGPT account.

1. **Discuss** the history of chatbots and predictive text with students **(10 min.)**
2. **Review** the [AI in 5 Minutes](#) website page to make sure students know what AI is **(5 min.)**
3. **Demo** how ChatGPT works by logging in at chat.openai.com and having a conversation with ChatGPT. Try this prompt **(15 min.)**
 - a. I want you to act like Ron from Harry Potter. I want you to respond and answer like Ron using the tone, manner and vocabulary he would use. Do not write any explanations. Only answer like Ron. You must know all of the knowledge of Ron. My first sentence is "Hi Ron."
4. **Discuss** the demo with students. Does it sound natural? What are its strengths and limitations? **(10 min.)**
5. **Give** students time to complete the "Get comfy with ChatGPT" section in their Student Guide **(45 min.)**

Interview with ChatGPT

Activities, continued

6. **Demo** how podcasters.spotify.com works by creating a new podcast and showing off how to record sound and add transitions. Students can use the web app or the mobile app to record their podcast. Both work similarly. (5 mins.)

Watch [this 4-minute step-by-step guide](#) to get started with Spotify for Podcasters

7. **Pair** students, then give them time to write and record their scripted interview with ChatGPT using chat.openai.com and Spotify for Podcasters. (3.5 hours)
- Students will choose a personality they'd like to interview, like a Minecraft streamer or makeup vlogger, write a set of interview questions for that person, then ask ChatGPT to act as the interviewee
 - One student will record the host's lines and the other will record ChatGPT's lines
 - The podcast should end with the students reflecting on the strengths and weaknesses of ChatGPT
 - The podcast can optionally include a short game show segment or quiz
8. **Encourage** students to share links to their completed podcasts with friends and family!

The **AI** Education Project
